Oct	$652,500	7,284	13,409	$90
Nov	$709,800	8,217	15,413	$86
Dec	$795,150	9,194	17,282	$86

Total revenue $8,280,550 · 95,739 orders · 179,888 units

SO WHAT

Three things to take away

Synthesizing the 2025 numbers

01

Growth is real, and steady

Revenue rose 24.8% from Q1 to Q4, and the second half finished stronger than the first. The trend looks structural rather than a one-off spike.

02

Summer is the moment

Jul was the peak month at $817k. Inventory, staffing and campaign spend should be planned around May–August.

03

Online is the growth engine

Online delivered $2,638k (31.9% of total) at the lowest average order value — volume, not price, is driving it.

Next step: model a 2026 plan that assumes 15% online growth and flat retail, then test the inventory implications for Q2–Q3.
